

THE GREEN COMMITTEE

Make it your new year's resolution to protect the environment!

Did you know that it takes a gallon of gas to make a new toner cartridge?

Did you know the plastic in ink and toner cartridges won't break down for hundreds of years!

Let's recycle our cartridges to save fuel and the environment!

A new recycling program that will help the environment AND raise funds for the schools' green programs! Coming to all Barrington Public Schools in January 2010

Save your ink cartridges and toner cartridges.
Marked bins will be in the lobby of each school in January

This will be an ongoing campaign, so get in the habit

Barrington Public Schools and Cartridge World RI will recycle your old cartridges and help get them turned into new ones.

Sponsored by the Barrington Public Schools Green Committee.
