

Food Advisory Committees

Purpose:

Our primary customers are the students we serve. It is important that we have a good rapport and open communication with our customers and an excellent means of doing that is the establishment of Food Advisory Committees. The purpose is to:

- Promote good nutrition habits among our students.
- Simulate interest and support for the foodservice program by students, teachers and parents.
- Provide student assistance with foodservice promotions.
- Serve as a communication bridge between students, foodservice and school administration.
- Make the foodservice program the best it can be.
- Act as a sounding board for questions, praises and constructive criticism.

Advisory committees are also a requirement set forth in the USDA program regulations.
